Address	Lot number
---------	------------

4. DESCRIPTION OF PROJECT

Projected start date (dd-mm-yyyy): _____

Projected end date (dd-mm-yyyy): _____

Motivation for tree clearing :

- Clear-cutting in the case of a force majeure (specify)
In this case, the deforested area must be reforested.
 - reconstruct a degraded stand
 - recover an old stand
 - recover sick trees
 - recover trees attacked by insects
 - recover dead trees
 - recover trees upset by the wind (wind throw)
 - recover trees affected by any natural problem
- Clear-cut in the case of tree planting
In this case, the deforested area must be reforested.
- Clear-cut for the purpose of soil cultivation
*limited to an area of one (1) hectare per year per lot
the deforested area must be cultivated within a period of three years or it will have to be reforested in accordance with article 6.7.7 of the zoning bylaw number 309.*
- Clear-cut (specify)
 - a selective, thinning, health and sanitation cut
 - a clear-cut conform to the current regulation
 - the cutting of trees necessary for the construction of approved buildings
 - the cutting of trees necessary for the development of waterways, in conformity with the measures concerning the protection of lakes and river banks
 - conversion cut
(a cut to the extent deemed necessary designated by a forestry engineer, a deforestation plan must be filed with the municipality)

- Tree cutting in the confinement area of the White-tailed Deer (specify)
As illustrated in annex F of Zoning By-law no. 309, only the following cuts are permitted in the confinement area of white-tailed deer
 - Clear-cut (specify)
 - a selective, thinning, health and sanitation cut
 - conversion cut
(a cut to the extent deemed necessary designated by a forestry engineer, a deforestation plan must be filed with the municipality)
 - Complete clear-cut for the purpose of (specify):
 - clearing work for agricultural enhancement
 - clearing work to carry out an activity or a construction for which a permit has been issued

Work near a sensitive area (lake, watercourse, wetland or ditch): YES NO
If "yes" you must provide details of environmental protection measures and stream crossing locations.

Is the cutting area (in part or in whole) in a sugar bush? YES NO
If you answered "yes" it is possible that an authorization from the *Commission de protection du territoire agricole du Québec (CPTAQ)* may be required (article 27 of the LPTAAQ).

Authorization number of the CPTAQ (if applicable): _____
Attach the authorization to this request

5. FORESTRY ENGINEER

7. COST ESTIMATION:

\$ _____

8. SIGNATURE

Signature : _____ Date : _____
(dd-mm-yyyy)

DOCUMENTS TO BE PROVIDED

Plan

A forest management plan, signed by a forestry engineer indicating:

- the identification of the property owner and (either on a forest map or aerial photograph) the property on which the concerned wooded area is located as well as the outline of the targeted wooded area and various forest stands;
- the year of the last cut, by sector, if necessary;
- a description of each forest stand and constraints related to the nature of the land or the presence of wildlife habitats;
- a description of the silvicultural treatments planned for each forest stand;

The following documents may also be necessary:

Procuration

Form to be filled out and submitted should the request be made by a mandatary or authorized person

Silvicultural prescription

A silvicultural prescription indicating:

- the owner's objectives, namely:
 - the development of the forest;
 - the development of wildlife;
 - maple production;
 - recreation areas;
 - others (specify);
- the delimitation of the area to be cut;
 - the nature and description of the work;
 - the expected dates of the beginning and the end of the works;
 - the planned regeneration or planting measures, if applicable;
